

OEC Fiber Connect with Webex

YOUR NEW COLLABORATION EXPERIENCE HAS ARRIVED

Collaboration | Cloud Calling | Advanced Messaging | Meeting Capabilities

Key Features of OEC Fiber Connect with Webex

- **Direct and Group Chats:** Enjoy extra flexibility with your chat messages: edit, delete, forward, flag for follow-up, quote, enthusiastic reactions, and threading
- **Messaging Capabilities:** Messaging and file sharing integrated with your content and workflow
- **History:** Everything is saved within your spaces, so you never lose track of your chats and content; all are safely archived
- **Notifications:** Minimize distractions without missing critical updates by customizing your information, so you only get alerts about messages that matter to you
- **Presence Status:** Smart presence lets you know when your colleagues are available, removing the guesswork from communicating
- **Offline Mode:** View your messages and listen to your voicemail when you don't have a data network connection, so you can always stay productive
- **External Collaboration:** Collaborate with people outside your company by adding external parties directly to spaces and federating with other XMPP applications
- **Single Number Reach:** Publish one business phone number and all your business calls will go to the device of your choice: desktop, tablet, or smartphone
- **Multiple Calls:** Handle two calls at the same time and even merge them into a three-way conversation
- **HD Video:** Use high-definition video and wideband audio codecs when you want to turn your audio call into a video call
- **Corporate Directory:** Easily access your corporate directory, enabling you to find colleagues within seconds with a simple search from any device
- **Call Pull:** Seamlessly move active calls from a desktop to a mobile or the reverse with a single click, without interrupting your ongoing call

Meetings-Key Features

Intelligent Collaboration with OEC Fiber Connect with Webex

- **Space Meetings:** Schedule a meeting or start an ad-hoc discussion with everyone in your space with a single click. And the bonus: everyone's a host, so anyone in the area can start the meeting
- **Personal Meeting Room*:** Enjoy your own private and secure online meeting room with a dedicated phone number where teams can participate in HD audio, video, messaging, and screen sharing collaboration
- **Screen Sharing:** Share your entire screen or just a specific app or a document without additional downloads or separate web collaboration apps. Sharing can be done from your desktop, and everyone can view it from a desktop, tablet, or smartphone. View in full screen or zoom in or out for better viewing
- **In-meeting Chat:** During meetings, desktop and mobile participants can chat to increase meeting effectiveness
- **Guest Collaboration:** Invite external people to join you in a multimedia collaboration session
- **Presenter Controls*:** Control various aspects of the meeting to manage the administrative side of the meeting
- **Connect with Intelligent Webex Devices**
- **Share content wirelessly:** When you connect to a Cisco Webex Board, desk, or room device, you can share content wirelessly when you're not in a call or meeting from your Webex app
- **Join a Webex Room Device:** Also, you can search for a particular device, use the device to join a meeting or make a call, and optimize audio or video of the shared content
- **Spaces Create:** Dedicated spaces to bring together your teams, your customers, and your workflows. Add integrations to your key productivity apps to ensure you are always in the know
- **Moderator Control:** Control who is joining specific spaces. Only you can add people to the space, and you get other privileges like deleting people's messages or files
- **File Sharing:** Drag and drop files with a colleague, or in a space for your whole team. These files you receive are neatly organized, searchable, and saved. Integrate with key content management apps such as SharePoint and Box to work directly on documents within your Webex spaces
- **White-boarding:** Sometimes, a quick sketch explains an idea better than words. In Webex, you can create a whiteboard and draw on it to share your thoughts. As you work, changes are saved automatically.
- **Intuitive Search:** Easily search across spaces, people, messages, and files to find what you need
- **Reduced Disruptions:** Webex reduces noise disruptions with noise removal and speech enhancement
- **Application Integration:** While you're chatting, everything you share with a colleague or a group, such as email messages or files from other business applications, is there at your fingertips. Webex is pre-integrated with Office 365, G-Suite, Salesforce, and other popular applications

*Only available with Standard or Premium packages
